Office Action Summary	Application No. 10/627,456	Applicant(s) BILGE, FERTAC	
	Examiner Christopher D. Prone	Art Unit 3738	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments, see pages 6-8, filed 10/31/05, with respect to the rejection(s) of claim(s) 1-13 and 17-22 under 102(b) and 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of the combination of USPP 2002/0049424 A1, Fulford in view of United States Patent 4,566,467 DeHaan described below.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 and 17-22 are rejected under 35 U.S.C. 103 as being unpatentable over United States patent Publication 2002/0049424 A1, Fulford in view of United States Patent 4,566,467 DeHaan.

Fulford discloses the invention substantially as claimed being a catheter (2), a tip (1) with a lumen extending therein (5) and a slot (3) shown in figure 1 of Fulford. However, Fulford does not disclose a retaining ring of shape memory material.

DeHaan teaches the use of a delivery catheter (10) comprising a tip (14) and a retention means being a ring (18) made of nitinol in the same field of endeavor for the

Art Unit: 3738

purpose of causing an interference fit between the tip and the catheter tube. In regards to claims 3-6 it is fully inherent that the retaining ring is in an austenitic phase in the first configuration, is temperature set to the first configuration, has a phase transformation temperature of below about 68 degrees Fahrenheit, in a temperature induced martensitic phase in the second configuration, or in a stress induced martensitic phase in the second configuration.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the retention ring of DeHaan with delivery catheter tip of Fulford in order to provide a secure locking fit between the catheter tip and catheter that will maintain its fit during the delivery inside the patient.
